4-5t
N Series Counterbalance
Electric Forklift Truck

■ Attractive Appearance

Vehicle appearance is designed by professional industrial design methods. Artistic and Strengthful.

■ Strong Stability

Battery is sinking designed to ensure vehicle stability. Integral type axle & gear box and short front overhang improve vehicle longitudinal stability. Overhead rear axle improves vehicle lateral stability.

■ Energy Efficiency

Transmission system and electric motor are professional matching designed. Battery life is prolonged by 30 minutes. Automatic turning slowdown function is optional. Equipped with LED light, energy and efficient.

■ Well-adapted

The battery can be equipped with an optional side-pull configuration to adapt to different operating environments; the high-power motor has strong power and good heat dissipation, making it easier to climb hills and work with a full load.

■ Convenient Maintenance

Special locking structure and side panel structure designed makes battery maintenance very convenient.

■ Wide field of view

The wide field of view mast gives the operator a very wide field of view.

Product details and advantages

Using conductive fast charging technology for new energy vehicles, the standard model can be fully charged within 2 hours. The lithium battery has no memory effect and can be charged and taken on the go.

During deceleration or braking, the braking energy feedback system converts the vehicle's kinetic energy into electrical energy to charge the battery.

The key parts of the whole machine, electric system, instruments, etc. are all made of internationally or domestically renowned brand products, and important components have undergone strict reliability tests.

Using A-grade lithium iron phosphate cells, each cell has a safety protection device to ensure the safety of the battery.
